Team Learning

Tailored experiential learning tasks designed to develop key life skills whilst cunningly disguised as fun activities.

Examples are:

Rex's Egg

In the steamy jungle a tyrannosaurs egg is not where it should be. The team needs to move the egg back to its nest before the mum returns!

Leonardo's Bridge

A superb task based on a portable bridge designed by Leonardo Da Vinci's over 500 years ago! The brilliance of the design is that it doesn't require nails, screws or string... just simple science.

Create Outside

Making things and having some good old-fashioned fun is also a fundamental feature of any great camping experience.

Withy lanterns

Land Art

Stick Sculptures

Kin-Ball

Fun-packed sports
& games sessions
